Editor's Pick: Kingdom Man by Tony Evans

When men want to create a better life for themselves and their families, they usually seek out a mentor who's successfully navigated the roads that lead to their dreams and goals. The absence of fathers and mentors undeniably creates a huge divide between potential and achievement. Christian pastor, author, and speaker Tony Evans bridges this gap with a practical approach to biblical scriptures that he believes can rise up a new nation of kingdom men.

Thought Leadership

The Cry for a Kingdom Man

By [Michael K. Dawson](#) | Friday, July 11, 2014

In February of last year, a friend of mine was leading a bible study at my church. His subject was "The Cry for a Kingdom Man" based on Dr. Tony Evans' book Kingdom Man. Dr. Evans is one of the country's most respected pastors. His church in Dallas, TX has over 10,000 members and he is heard nationally across the airwaves every day.

As soon as I got home from church, I dialed up Amazon and bought the book. Since then I have read several more of his books. In Kingdom Man, Dr. Evans makes a profound statement that I continue to think about every day.

He says that the problems of today are not economic although they fall within that realm. They are not social or political although they fall within that realm. The problems of today are spiritual and it's the lack of Kingdom Men. Initially I didn't quite get it, but after much reflection it made sense.

Culture is playing a far more significant role in the establishment of values than in the past. There are some that celebrate going to prison – going as far as throwing a party before going in. Gone are the days of there being a stigma attached to having a baby at 16 or 17 years of age. Dr. Evans' premise is that today's problems are deeply rooted in the decision making process which has been degraded by the decline in moral and spiritual values.
